CALLED BONDS SECTION

This section lists alphabetically bonds covered in the Guide which have been called for redemption in whole or in part, indicating th amount called, the call price, date of redemption, and where payment is made. The notice of the call is carried in this section until th redemption date is reached. Numbers of bonds called of partial redemptions may be checked with list on file at our office.

Obviously, it is not practicable to publish within the narrow confines of this publication a comprehensive called bond service, such as is presented in Standard & Poor's "Called Bond Record." Users of the Bond Guide requiring extensive called bond coverage, including a complete record of tenders asked and proposals, information on bonds in default, comprehensive bond interest payments, and redemption data on equities. are referred to that publication.

HOW TO USE STANDARD & POOR'S BOND GUIDE

It is necessary to read carefully the following instructions in order to obtain the correct interpretation of the various abbreviations and data in the Guide.

GENERAL INFORMATION Interest Payments, Bonds Called, Etc.	Underwriting and MARKET	OUTSTANDING Amt.—Mil.$—Total This Issue / Prior Liens / Fund Debt	FINANCIAL POSITION Mil.$ Cash & Equiv. / Curr. Assets / Curr. Liabs. / Balance Sheet Date	Yrs. End.	ANNUAL EARNINGS Times Int. & Misc. Charges Earned Historical Low / Low / Latest 3 Years	INTERIM EARNINGS Times Earned Period / Comparison	INDEX
In this column is given information of a general character which may be necessary to round out the material presented in the other columns. Here will be found such information as latest income bond interest payments, name of the assuming company, if any; guarantors, information on bond committees, status in possible reorganization, etc. Similar additional information occasionally will be presented in other columns when necessary.	This column shows, by keys to the Directory of Dealers in the rear of the book, the original underwriter of the issue, shown in italics, and the present interested over-the-counter dealers. Issues traded on national security exchanges are so indicated by abbreviations (Page 7) of those exchanges.	This is the amount of the issue outstanding in millions of dollars, as of the balance sheet date shown under Financial Position, unless otherwise noted, except for Railroads which is as of the fiscal year end. This column shows the amount of obligations which, in the opinion of Standard & Poor's, rank prior to the issue under consideration. Total funded debt of the company or system, including Purchase Money Obligations, Equipments, Real Estate Mortgages, etc.	Cash & Equivalent, Current Assets and Current Liabilities are given in millions of dollars (000,000 omitted), as 17.5—$17,500,000; 1.75—$1,750,000; 0.18—$175,000, etc. All information in this column is brought up to date upon the release of interim statements. The date of the balance sheet from which the information shown was obtained is also given. Where current balance sheet items are not of analytical significance, special calculations pertinent to the industry in which the company operates are presented, as "Net Asset Value Per $1,000 Bond" for Investment Trusts, etc.	This is the month of the Company's fiscal year closes.	The number of times that available earnings cover interest and miscellaneous charges, making up what is generally known as "fixed charges" is shown in these columns for the periods of the column heads. In the first two columns only the figure representing the worst year of the period is given, as a guide to the adequacy of such coverage under adverse conditions. Coverage figures for fiscal years ending March 31 or earlier are shown under the columns of the preceding calendar year. Earnings available for income bond interest payments are shown as a percent of par value of the issue outstanding. Fixed charges include not only interest on funded debt, but also interest on bank loans and other forms of floating debt, amortization, conversion discounts on securities sold, and any other similar charges. Earnings available for fixed charges are calculated by Standard & Poor's and shown in the Bond Guide after allowance for income taxes, but before extraordinary charges or appropriations to special reserves. In many instances where important reorganizations have taken place in recent years, the coverage figures are given for previous years on the basis of earnings in these years but on the charges after reorganization. Such cases are correspondingly footnoted. Interim coverage figures, etc., are shown, when and where available, for the longest accounting interval since the last fiscal year end.

STANDARD & POOR'S CORPORATION

HOW TO USE STANDARD & POOR'S BOND GUIDE

It is necessary to read carefully the following instructions in order to obtain the correct interpretation of the various abbreviations and data in the Guide.

INDEX	Exchange	BONDS Name and Description of Issue Description, Interest Rate, Due and Interest Date	S&P Quality Rating	Eligibility	Tax Status Legality	Original Offering Price & Data	CALL PRICE For S.F.	Reg-ular	PRICE RANGE Historical High Low	Last Year High Low	Current Year High Low	Last Sale and date f=flat	Bid Ask	Yield to Mty.
The index numbers are a visual guide to the columnar data.	Indicates: ● traded New York Stock Exchange ◆ American Stock Exchange.	This column gives the name of the issue. In many instances, because of their length, names are abbreviated, as for example, Pr.—Power; Lt. P.—Light, Ry.—Railway, etc. Also see standard abbreviations used on Page 7. Every effort has been made, within space limitations, to show the exact corporate title of the issuing company. This column describes the issue, giving the interest rate and due date. Abbreviations are widely used, as for example, Deb—Debenture, Ctfs—Certificates, Ext—External, etc. A complete list of abbreviations used in the Earnings and Ratings Bond Guide will be found on Page 7. Interest dates are indicated by the first letter of the alternate six months on which coupons are payable. Unless otherwise noted, such interest dates are always the first day of the month. The month of maturity is indicated by a capital letter.	A complete explanation of Standard & Poor's Bond Quality Ratings is presented on Page 5.	See explanation on Page 4, and Bank Investment Regulations on Page 6. Please refer to detailed explanation on Page 4 as to Tax Status. Please refer to Page 4 for details Legality features and symbols.	This is the price and date at which the issue was originally offered. When necessary, prices are shown to the nearest eighth.	This space shows the call price for sinking fund, if any, as well as the regular call price. Unless otherwise indicated, bonds are callable at any time. The symbol † means that the call price shown cannot be used without qualification, in that the price shown will decline within the next twelve months. See also page 4 for other symbols and explanation.		**High and Low price ranges are for the calendar years indicated.** Price ranges are not necessarily exclusive for the exchange, if any, on which the bond is currently traded, but are based on the best available data covering the period of the column head, since issuance of the bond. The price range of "Over-the-Counter" bonds is based on the best available information as to the high and low "Bid" prices during the period. Because of the lack of reliable data, some of these "Over-the-Counter" ranges may be subject to a fair margin of error. Generally, unlisted bond ranges should best be viewed as reasonable approximations.		Last sale price and date when last sold shown for securities listed on either the New York or American Stock Exchanges. "Flat" means that the bond is traded on a "without accrued interest" basis.	For listed issues, bid and ask as of date shown over previous column, if no sale occurred that date; for issues traded over-the-counter, latest bid and ask available. Canadian prices shown by ▲.	Yields are computed on the last or on the "Ask" price, except where there is only a "Bid" for the issue. Serial maturities are figured on a current yield basis.

Standard & Poor's Earnings and Ratings

BOND GUIDE

Published

OCTOBER • 1963

Standard & Poor's Bond Guide is designed to present in a convenient, com- manner the most pertinent comparative financial and statistical information a broad list of corporate bonds. Thus, it is an ideal medium for formulating uick opinion as to the relative investment merits of the numerous bond issues ered, and for following the trend of their market prices and yields. In addition, ndard & Poor's Bond Quality Ratings are presented for most bonds. The ies of the companies are arranged alphabetically, thus providing the utmost of reference.

Numerous pages of the Bond Guide are devoted to significant supplementary rmation, including recent changes in S & P Bond Quality Ratings, changes Bank Status, long term records of bond yields, graphic yield charts, etc. In ition, a special section in each issue of the Bond Guide is devoted to bonds ed for redemption and new bond issues registered with the SEC.

United States Government bonds are presented in still another special section of the book. Federal Land Bank bonds, Federal National Mortgage notes and debentures, Public Authority bonds and New York City and State bonds are covered on yet another page.

Four pages are devoted to a summary of convertible bond provisions, adding to the full coverage given each issue in the main section of the Guide.

Although the Bond Guide is not itself an analytical publication, it represents, nevertheless, the results of intensive and extensive analysis by bond specialists utilizing all our extensive facilities. The Bond Quality Ratings in particular are the end result of wide analytical research and special investigation. The factual data presented have been obtained from official company reports and reports to the SEC.

ATTRACTIVE BONDS

The bonds listed on this and the following page are selections from current recommendations in Standard & Poor's bond advisory publications. These publication include STANDARD & POOR'S BOND INVESTMENTS, which include a weekly "Bond Outlook" discussing and analyzing the bond market in relation to the economi and monetary prospect, and the well-known S & P "Bond Selectors"; and STANDARD BOND REPORTS, a bond advisory service consisting of individual loose-le analytical reports and forecasts on bonds in which there is representative investor's interest. It is earnestly advised that, before making purchases of any of the bond in the following lists, subscribers consult first, whenever possible, the detailed recommendation contained on the individual report, and that such purchases only be mad if in accordance with existing recommendations as to general bond market policy and portfolio requirements.

Bonds are listed according to maturity, utility issues first, followed by industrial and railroad bonds.

HOW TO USE THE S & P EARNINGS AND RATINGS BOND GUIDE

The following explanations are in addition to those given in the pilot pages shown on the inside front and inside rear covers.

ELIGIBILITY

Under regulations issued by the Comptroller of the Currency, as shown on Page 6, only certain bond issues are eligible for bank investment. The standing under these regulations of the various bond issues covered by the Bond Guide is indicated under the "Eligibility" column, by the following symbols:

X—This symbol designates bonds rated the equivalent of Standard & Poor's AAA, AA, A or BBB ratings by a majority of the three recognized rating agencies which have assigned ratings to the issue.

X¶—These are "special privilege" bonds. They include "convertible" and "with warrants" issues. In the opinion of Standard & Poor's they may be considered "eligible" provided the speculative value of their "special privilege" is not reflected in their current market price.

Y—These are bonds which do not conform with the above rating classification. It is the S & P opinion that bonds carrying the (Y) symbol are those which may be valued at the average market price for 18 months just preceding examination.

Z—This symbol indicates bonds with a default status.

Q—These are foreign bonds whose bank eligibility is not determined by the ratings of the various agencies.

TAX STATUS

The numerals in this column of the Bond Guide indicate the Federal Income Taxes paid at the source: 1—1% paid by the company, 2—2% paid by the company, O—no tax paid by the company, "R"—indicates tax paid by the holder of the bond (up to 2%) is refunded by the company.

Subscribers requiring comprehensive information on the tax status of bonds are referred to Standard & Poor's "Status of Bonds" and quarterly supplements, which cover the exact tax status under both the Federal and State taxes and serves as a coupon directory.

LEGALITY

Symbols in this column of the Bond Guide indicate representative states in which the various issues covered qualify a legal investments. For all states bonds legal for savings bank also are believed suitable for trust funds. In New Jersey all bond legal for savings banks are legal for trust funds, but numerou other issues also meet the requirements of the more liberal tru fund law, and are so additionally indicated.

CALL PRICES

As indicated by the column heads, the Earnings and Ratin Bond Guide presents both the regular call price of the bon covered and the call price for sinking fund, if any.

Unless otherwise indicated, the issues are callable at any tim When a bond is callable only on an interest date, it is so show by the use of the symbol (*). The symbol (†) means that t call price as given will decline sometime within the next twel months in accordance with the indenture provisions of the bon Thus, the call prices so shown must not be used without quali cations. The symbol (‡) means that not only can the bond called only on an interest date, but also that the call price w decline within the next twelve months.

Non-callable bonds are so indicated by the abbreviation N Special abbreviations are also necessary when a bond is not n callable but will be callable at a later date, in which case, f example, the use of 2'66 would mean non-callable now but callab at 102 in 1966. The use, as another exampe of special call feature of ½-3 would indicate the range of call prices on serial maturi bonds, the first figure (100½) being the present call price f the first maturity and the last figure (103) being the call price f the last maturity.

STANDARD & POOR'S BOND RATINGS

In the Standard & Poor's bond quality ratings system, interest-paying bonds are graded into eight classifications ranging from AAA for the highest quality designation through AA, A, BBB, BB, B, CCC to CC for the lowest. Bonds on which no interest is being paid, either because of default or because of "income" characteristics, are given C, DDD, DD and D ratings. United States Government bonds are not rated, but are considered as a yardstick against which to measure all other issues.

BANK QUALITY BONDS

Under present commercial bank regulations bonds rated in the top four categories (AAA, AA, A, BBB or their equivalent) generally are regarded as eligible for bank investment.

AAA Bonds rated AAA are highest grade corporate obligations. They possess the ultimate degree of protection as to principal and interest. Marketwise, they move with interest rates, and hence provide the maximum safety on all counts.

AA Bonds rated AA also qualify as high grade obligations, and in the majority of instances differ from AAA issues only in small degree. Here, too, prices move with the long term money market.

A Bonds rated A are regarded as upper medium grade. They have considerable investment strength but are not entirely free from adverse effects of changes in economic and trade conditions. Interest and principal are regarded as safe. They predominantly reflect money rates in their market behavior, but to some extent, also business conditions.

BBB The BBB, or medium grade category is borderline between definitely sound obligations and those where the speculative element begins to predominate. These bonds have adequate asset coverage and normally are protected by satisfactory earnings. Their susceptibility to changing conditions, particularly to depressions, necessitates constant watching. Marketwise, the bonds are more responsive to business and trade conditions than to interest rates. This group is the lowest which qualifies for commercial bank investment.

SUB-STANDARD BONDS

As we move down the rating scale, beginning with BB, investment characteristics weaken and the speculative elements become progressively stronger. The fortunes of the obligors change rapidly with economic and trade conditions and in adverse periods interest requirements may not be earned. Investment in bonds in this group must be under constant surveillance. Prices fluctuate widely with changing business conditions and with little regard for the money market.

BB Bonds given a BB rating are regarded as lower medium grade. They have only minor investment characteristics. In the case of utilities, interest is earned consistently but by narrow margins. In the case of other types of obligors, charges are earned on average by a fair margin, but in poor periods deficit operations are possible.

B Bonds rated as low as B are speculative. Payment of interest cannot be assured under difficult economic conditions.

CCC-CC Bonds rated CCC and CC are outright speculations, with the lower rating denoting the more speculative. Interest is paid, but continuation is questionable in periods of poor trade conditions. In the case of CC ratings the bonds may be on an income basis and the payment may be small.

C The rating of C is reserved for income bonds on which no interest is being paid.

DDD-D All bonds rated DDD, DD and D are in default, with the rating indicating the relative salvage value.

CANADIAN BONDS

Canadian corporate bonds are rated on the same basis as American corporate issues. The ratings measure the intrinsic value of the bonds, but they do not take into account exchange and other uncertainties.

FOREIGN BONDS

Foreign bonds carry the same rating symbols as domestic bonds, but in all cases they are preceded by a ★ to denote a conditional rating. This is applied because the obligor is a foreign body and the bonds are sometimes affected by other than economic factors.

BANK INVESTMENT SECURITIES REGULATION

Effective Aug. 16, 1957, the Comptroller of the Currency issued following regulation applying to the purchase for its own account of investment securities by a national bank or a State member bank of the Federal Reserve System.

Definition of the Term "Investment Securities"

(a) An obligation of indebtedness which may be purchased for its own account by a national bank or State member bank of the Federal Reserve System in order to constitute an "investment security" within the meaning of paragraph Seventh of section 5136 of the Revised Statutes, must be a marketable obligation, i.e., it must be salable under ordinary circumstances with reasonable promptness at a fair value; and except as provided in (b) and (c) below, there must be present one or both of the following characteristics:

(1) A public distribution of the securities must have been provided for or made in a manner to protect or insure the marketability of the issue; or,

(2) Other existing securities of the obligor must have such a public distribution as to protect or insure the marketability of the issue under consideration.

(b) In the case of investment securities for which a public distribution as set forth in (1) or (2) above cannot be so provided, or so made, and which are issued by established commercial or industrial businesses or enterprises, that can demonstrate the ability to service such securities, the debt evidenced thereby must mature not later than ten years after the date of issuance of the security and must be of such sound value or so secured as reasonably to assure its payment; and such securities must, by their terms, provide for the amortization of the debt evidenced thereby so that at least 75% of the principal will be extinguished by the maturity date by substantial periodic payments: Provided, that no amortization need be required for the period of the first year after the date of issuance of such securities.

(c) Special revenue obligations of States or local governments or of duly constituted public Authorities thereof which possess a high degree of credit soundness, so as to assure sale under ordinary circumstances with reasonable promptness at a fair value, but which do not meet the distribution standards of (a) (1) or (a) (2) above, may be considered to constitute "investment securities."

(d) Where the security is issued under a trust agreement, the agreement must provide for a trustee independent of the obligor, and such trustee must be a bank or trust company.

(e) All purchases of investment securities by national and State member banks for their own account must be securities "in the form of bonds, notes, and/or debentures, commonly known as investment securities"; and every transaction which is in fact such a purchase must, regardless of its form, comply with this regulation.

Limitations and Restrictions on Purchase of Investment Securities For Bank's Own Account

(a) Although the bank is permitted to purchase "investment securities" its own account for purposes of investment under the provisions of R. S. and this regulation, the bank is not permitted otherwise to participate principal in the marketing of securities.

(b) The statutory limitation on the amount of the "investment securit of any one obligor or maker which may be held by the bank is to be determ on the basis of the par or face value of the securities, and not on market value.

(c) The purchase of "investment securities" in which the investment cha teristics are distinctly or predominantly speculative, or the purchase of se ties which are in default, whether as to principal or interest, is prohibited

(d) Purchase of an investment security at a price exceeding par or face v is prohibited, unless the bank shall:

(1) Provide for the regular amortization of the premium paid so that premium shall be entirely extinguished at or before the maturity of security, and the security (including premium) shall at no intervening be carried at an amount in excess of that at which the obligor may leg redeem such security, unless the amortization which would be necessar meet the latter requirement would not be allowable as a deduction gross income under applicable Federal Internal Revenue laws and re tions issued thereunder, in which case the rate of amortization shal sufficient to extinguish the premium by maturity; or

(2) Set up a reserve account to amortize the premium, said account credited periodically with an amount not less than the amount require amortization under (1) above.

(e) Purchase of securities convertible into stock at the option of the is is prohibited.

(f) Purchase of securities convertible into stock at the option of the h or with stock purchase warrants attached is prohibited if the price pai such security is in excess of the investment value of the security i considered independently of the stock purchase warrants or conversion fea If it is apparent that the price paid for an otherwise eligible security re the investment value of the security and does not include any specul value based upon the presence of a stock purchase warrant or conversion op the purchase of such security is not prohibited. If the price paid for a vertible security provides a yield reasonably similar to that of non-conver securities of similar quality and maturity, a speculative value will no deemed to exist.

(g) All investment securities shall be supported by adequate informatio the files of the bank as to their investment quality.

All issues subject to all Federal taxes except where noted. Exempt under present laws from State income taxes.
†—After deducting present normal tax of 30% and/or 22% surtax as they apply to the yield shown for each issue. ‡—Approximate—52% tax rate applies to coupon; capital gains rate of 25% to appreciation to par at maturity. ♦—Acceptable at par in payment of Federal estate taxes when actually owned by the decedent at time of his death.
*—Callable on any interest payment date on 4 month's prior notice.

CALLED BONDS SECTION

This section lists alphabetically bonds covered in the Guide which have been called for redemption in whole or in part, indicating t amount called, the call price, date of redemption, and where payment is made. The notice of the call is carried in this section until t redemption date is reached. Numbers of bonds called of partial redemptions may be checked with list on file at our office.

Obviously, it is not practicable to publish within the narrow confines of this publication a comprehensive called bond service, su as is presented in Standard & Poor's "Called Bond Record." Users of the Bond Guide requiring extensive called bond coverage, includi a complete record of tenders asked and proposals, information on bonds in default, comprehensive bond interest payments, and redemptio data on equities, are referred to that publication.

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION

(Act of October 23, 1962; Section 4369, Title 39, United States Code)

1. Date of Filing: Oct. 1, 1963.
2. Title of Publication—STANDARD & POOR'S EARNINGS AND RATINGS BOND GUIDE.
3. Frequency of Issue—Monthly.
4. Location of known office of publication—345 Hudson St., New York, N. Y. 10014
5. Location of the headquarters or general business offices of the publishers—345 Hudson St., New York, N. Y. 10014.
6. Names and addresses of publisher, editor, and managing editor are:

Publisher, Standard & Poor's Corp.___345 Hudson St., N. Y.
Editor, William M. Schifferli _____345 Hudson St., N. Y.
Managing Editor, C. G. Norman ____345 Hudson St., N. Y.

7. Owner (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual, must be given.)

Standard & Poor's Corporation, 345 Hudson St., New York, N. Y. 10014.

Stockholders owning 1% or more of total amount of stock are: P. B. Coffman, L. H. Langston, C. G. Norman, L. L. Schellbach, C. A. Schmutz, F. A. Stahl, and H. L. Wyman, all of 345 Hudson St., N.Y.C., P. T. Babson, Wellesley, Mass., Ray Reed Blake et al., Trustees, Lyme, Conn., G. Baron, 103 Park Ave., N.Y.C., Geffen, Morton & Griffiths, 130 Cedar St., N.Y.C., Helen M. Schmutz, Great Neck, N. Y., Ruth Coffman, N.Y.C., Mildred J. Langston, Rumson, N. J., Josepha Stahl, Brookville, N. Y., and F. W. Whittemore, Trustee, Boston, Mass.

8. Known bondholders, mortgagees, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages, or other securities: (If there are none, so state.) None.

9. Paragraphs 7 and 8 include, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting; also the statements in the two paragraphs show the affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner. Names and addresses of individuals who are stockholders of a corporation which itself is a stockholder or holder of bonds, mortgages or other securities of the publishing corporation have been included in paragraphs 7 and 8 when the interests of such individuals are equivalent to 1% or more of the total amount of the stock or securities of the publishing corporation.

10. This item must be completed for all publications except those which do not carry advertising other than the publisher's own and which are named in Sections 132.231, 132.232, and 132.233, postal manual (Sections 4355a, 4355b, and 4356 of Title 39, United States Code)

	Average No. Copies Each Issue During Preceding 12 Months	Single Issue Nearest to Filing Date
A. Total No. Copies Printed (Net Press Run)	6,605	6,586
B. Paid Circulation		
1. To term subscribers by mail, carrier delivery or by other means	6,155	6,136
2. Sales through agents, news dealers, or otherwise	None	None
C. Free distribution (including samples) by mail, carrier delivery, or by other means	255	218
D. Total No. of copies distributed (Sum of lines B1, B2 and C)	6,410	6,354

I certify that the statements made by me above are correct and complete. L. H. LANGSTON, Business Manager.

HOW TO USE STANDARD & POOR'S BOND GUIDE

It is necessary to read carefully the following instructions in order to obtain the correct interpretation of the various abbreviations and data in the Guide.

GENERAL INFORMATION
Interest Payments, Bonds Called, Etc.

In this column is given information of a general character which may be necessary to round out the material presented in the other columns. Here will be found such information as latest income bond interest payments, name of the assuming company, if any; guarantors, information on bond committees, status in possible reorganization, etc. Similar additional information occasionally will be presented in other columns when necessary.

Underwriting and MARKET

This column shows, by keys to the Directory of Dealers in the rear of the book, the original underwriter of the issue, shown in italics, and the present interested over-the-counter dealers. Issues traded on national security exchanges are so indicated by abbreviations (Page 7) of those exchanges.

OUTSTANDING

Amt.—Mil-$—Total

This Issue | Prior Liens | Fund Debt

This is the amount of the issue outstanding in millions of dollars, as of the balance sheet date shown under Financial Position, unless otherwise noted, except for Railroads which is as of the fiscal year end.

This column shows the amount of obligations which, in the opinion of Standard & Poor's, rank prior to the issue under consideration.

Total funded debt of the company or system, including Purchase Money Obligations, Equipments, Real Estate Mortgages, etc.

FINANCIAL POSITION

Mil-$ — Balance

Cash & Equiv. | Curr. Assets | Curr. Liabs. | Sheet Date

Cash & Equivalent, Current Assets and Current Liabilities are given in millions of dollars (000,000 omitted), as 17.5—$17,500,000; 1.75—$1,750,000; 0.18—$175,000, etc. All information in this column is brought up to date upon the release of interim statements. The date of the balance sheet from which the information shown was obtained is also given.

● Where current balance sheet items are not of analytical significance, special calculations pertinent to the industry in which the company operates are presented as "Net Asset Value Per $1,000 Bond" for Investment Trusts, etc.

ANNUAL EARNINGS

Yrs. End. | Times Int. & Misc. Charges Earned — Historical: Low | Low | Latest 3 Years

This is the month of the year in which the Company's fiscal year closes.

The number of times that available earnings cover interest and miscellaneous charges, making up what is generally known as "fixed charges" is shown in these columns for the periods of the column heads. In the first two columns only the figure representing the worst year of the period is given as a guide to the adequacy of such coverage under adverse conditions. Coverage figures for fiscal years ending March 31 or earlier are shown under the columns of the preceding calendar year.

Earnings available for income bond interest payments are shown as a percent of par value of the issue outstanding. Fixed charges include note only interest on funded debt, but also interest on bank loans and other forms of floating debt, amortization charges, discounts on securities sold, and any other similar charges. Earnings available for fixed charges are calculated by Standard & Poor's and shown in the Bond Guide after allowance for income taxes, but before extraordinary charges or appropriations to special reserves.

In many instances where important reorganizations have taken place in recent years, the coverage figures are given for previous years on the basis of earnings in these years but on the charges after reorganization. Such cases are correspondingly footnoted.

INTERIM EARNINGS

Times Earned — Period | Comparison

Interim coverage figures, etc., are shown, when and where available, for the longest accounting interval since the last fiscal year-end.

STANDARD & POOR'S CORPORATION

HOW TO USE STANDARD & POOR'S BOND GUIDE

It is necessary to read carefully the following instructions in order to obtain the correct interpretation of the various abbreviations and data in the Guide.

The index numbers are a visual guide to the columnar data.

INDEX

Exchange

Indicates: ● traded New York Stock Exchange ◆ American Stock Exchange.

BONDS
Name and Description of Issue
Description, Interest Rate, Due and Interest Date

This column gives the name of the issue. In many instances, because of their length, names are abbreviated, as for example, Pr. — Power, Lt. — Light, Ry. — Railway etc. Also see standard abbreviations used on Page 7. Every effort has been made, within space limitations, to show the exact corporate title of the issuing company.

This column describes the issue, giving the interest rate and due date. Abbreviations are widely used, as for example, Deb—Debenture, Ctfs—Certificates, Ext—External, etc. A complete list of abbreviations used in the Earnings and Ratings Bond Guide will be found on Page 7.

Interest dates are indicated by the first letter of the alternate six months on which coupons are payable. Unless otherwise noted, such interest dates are always the first day of the month. The month of maturity is indicated by a capital letter.

S&P Quality Rating

A complete explanation of Standard & Poor's Bond Quality Ratings is presented on Page 5.

Eligibility

See explanation on Page 4, and Bank Investment Regulations on Page 6.

Tax Status
Legality

Please refer to detailed explanation on Page 4 as to Tax Status.
Please refer to Page 4 for detail... Legality features and symbols

Original Offering Price & Data

This is the price and date at which the issue was originally offered. When necessary, prices are shown to the nearest eighth.

CALL PRICE
For S.F. — Regular

This space shows the call price for sinking fund, if any, as well as the regular call price. Unless otherwise indicated, bonds are callable at any time. The symbol † means that the call price shown cannot be used without qualification, in that the price shown will decline within the next twelve months. See also page 4 for other symbols and explanation.

PRICE RANGE
Historical High Low — Last Year High Low — Current Year High Low

High and Low price ranges are for the calendar years indicated.

Price ranges are not necessarily exclusive for the exchange, if any, on which the bond is currently traded, but are based on the best available data covering the period of the column head, since issuance of the bond.

The price ranges of "Over-the-Counter" bonds is based on the best available bid quotations to the high and low "Bid" prices during the period. Because of the lack of reliable data, some of these "Over-the-Counter" ranges may be subject to a fair margin of error. Generally, best bond ranges should best be viewed as reasonable approximations.

Last Sale and date if—flat

Last sale price and date when last sold on for securities listed on either the New York or American Stock Exchanges. "Flat" means that the bond is traded on a "without accrued interest" basis.

Bid Ask

For listed issues, bid and ask as of date shown over previous column, if no sale occurred that date. For issues traded over-the-counter, latest bid and ask available. Canadian prices shown by ▲.

Yield to Mty. — **Cur Yld**

Yields are computed on the last or on the "Ask" price, except where there is only a "Bid" for the issue. Serial maturities are figured on a current yield basis.

BOND GUIDE

Published

NOVEMBER • 1963

andard & Poor's Bond Guide is designed to present in a convenient, com-anner the most pertinent comparative financial and statistical information road list of corporate bonds. Thus, it is an ideal medium for formulating opinion as to the relative investment merits of the numerous bond issues , and for following the trend of their market prices and yields. In addition, rd & Poor's Bond Quality Ratings are presented for most bonds. The of the companies are arranged alphabetically, thus providing the utmost reference.

umerous pages of the Bond Guide are devoted to significant supplementary ation, including recent changes in S & P Bond Quality Ratings, changes k Status, long term records of bond yields, graphic yield charts, etc. In n, a special section in each issue of the Bond Guide is devoted to bonds for redemption and new bond issues registered with the SEC.

United States Government bonds are presented in still another special section of the book. Federal Land Bank bonds, Federal National Mortgage notes and debentures, Public Authority bonds and New York City and State bonds are covered on yet another page.

Four pages are devoted to a summary of convertible bond provisions, adding to the full coverage given each issue in the main section of the Guide.

Although the Bond Guide is not itself an analytical publication, it represents, nevertheless, the results of intensive and extensive analysis by bond specialists utilizing all our extensive facilities. The Bond Quality Ratings in particular are the end result of wide analytical research and special investigation. The factual data presented have been obtained from official company reports and reports to the SEC.

HOW TO USE THE S & P EARNINGS AND RATINGS BOND GUIDE

The following explanations are in addition to those given in the pilot pages shown on the inside front and inside rear covers.

ELIGIBILITY

Under regulations issued by the Comptroller of the Currency, as shown on Page 6, only certain bond issues are eligible for bank investment. The standing under these regulations of the various bond issues covered by the Bond Guide is indicated under the "Eligibility" column, by the following symbols:

X—This symbol designates bonds rated the equivalent of Standard & Poor's AAA, AA, A or BBB ratings by a majority of the three recognized rating agencies which have assigned ratings to the issue.

X¶—These are "special privilege" bonds. They include "convertible" and "with warrants" issues. In the opinion of Standard & Poor's they may be considered "eligible" provided the speculative value of their "special privilege" is not reflected in their current market price.

Y—These are bonds which do not conform with the above rating classification. It is the S & P opinion that bonds carrying the (Y) symbol are those which may be valued at the average market price for 18 months just preceding examination.

Z—This symbol indicates bonds with a default status.

Q—These are foreign bonds whose bank eligibility is not determined by the ratings of the various agencies.

TAX STATUS

The numerals in this column of the Bond Guide indicate the Federal Income Taxes paid at the source: 1—1% paid by the company, 2—2% paid by the company, O—no tax paid by the company, "R"—indicates tax paid by the holder of the bond (up to 2%) is refunded by the company.

Subscribers requiring comprehensive information on the tax status of bonds are referred to Standard & Poor's "Status of Bonds" and quarterly supplements, which cover the exact tax status under both the Federal and State taxes and serves as a coupon directory.

LEGALITY

Symbols in this column of the Bond Guide indicate representative states in which the various issues covered qualify as legal investments. For all states bonds legal for savings banks also are believed suitable for trust funds. In New Jersey all bonds legal for savings banks are legal for trust funds, but numerous other issues also meet the requirements of the more liberal trust fund law, and are so additionally indicated.

CALL PRICES

As indicated by the column heads, the Earnings and Ratings Bond Guide presents both the regular call price of the bonds covered and the call price for sinking fund, if any.

Unless otherwise indicated, the issues are callable at any time. When a bond is callable only on an interest date, it is so shown by the use of the symbol (*). The symbol (†) means that the call price as given will decline sometime within the next twelve months in accordance with the indenture provisions of the bond. Thus, the call prices so shown must not be used without qualifications. The symbol (‡) means that not only can the bond be called only on an interest date, but also that the call price will decline within the next twelve months.

Non-callable bonds are so indicated by the abbreviation NC. Special abbreviations are also necessary when a bond is not now callable but will be callable at a later date, in which case, for example, the use of 2'66 would mean non-callable now but callable at 102 in 1966. The use, as another exampe of special call features, of ½-3 would indicate the range of call prices on serial maturity bonds, the first figure (100½) being the present call price for the first maturity and the last figure (103) being the call price for the last maturity.

STANDARD & POOR'S BOND RATINGS

In the Standard & Poor's bond quality ratings system, interest-paying bonds are graded into eight classifications ranging from AAA for the highest quality designation through AA, A, BBB, BB, B, CCC to CC for the lowest. Bonds on which no interest is being paid, either because of default or because of "income" characteristics, are given C, DDD, DD and D ratings. United States Government bonds are not rated, but are considered as a yardstick against which to measure all other issues.

BANK QUALITY BONDS

Under present commercial bank regulations bonds rated in the top four categories (AAA, AA, A, BBB or their equivalent) generally are regarded as eligible for bank investment.

AAA Bonds rated AAA are highest grade corporate obligations. They possess the ultimate degree of protection as to principal and interest. Marketwise, they move with interest rates, and hence provide the maximum safety on all counts.

AA Bonds rated AA also qualify as high grade obligations, and in the majority of instances differ from AAA issues only in small degree. Here, too, prices move with the long term money market.

A Bonds rated A are regarded as upper medium grade. They have considerable investment strength but are not entirely free from adverse effects of changes in economic and trade conditions. Interest and principal are regarded as safe. They predominantly reflect money rates in their market behavior, but to some extent, also business conditions.

BBB The BBB, or medium grade category is borderline between definitely sound obligations and those where the speculative element begins to predominate. These bonds have adequate asset coverage and normally are protected by satisfactory earnings. Their susceptibility to changing conditions, particularly to depressions, necessitates constant watching. Marketwise, the bonds are more responsive to business and trade conditions than to interest rates. This group is the lowest which qualifies for commercial bank investment.

SUB-STANDARD BONDS

As we move down the rating scale, beginning with BB, investment characteristics weaken and the speculative elements become progressively stronger. The fortunes of the obligors change rapidly with economic and trade conditions and in adverse periods interest requirements may not be earned. Investment in bonds in this group must be under constant surveillance. Prices fluctuate widely with changing business conditions and with little regard for the money market.

BB Bonds given a BB rating are regarded as lower medium grade. They have only minor investment characteristics. In the case of utilities, interest is earned consistently but by narrow margins. In the case of other types of obligors, charges are earned on average by a fair margin, but in poor periods deficit operations are possible.

B Bonds rated as low as B are speculative. Payment of interest cannot be assured under difficult economic conditions.

CCC-CC Bonds rated CCC and CC are outright speculations, with the lower rating denoting the more speculative. Interest is paid, but continuation is questionable in periods of poor trade conditions. In the case of CC ratings the bonds may be on an income basis and the payment may be small.

C The rating of C is reserved for income bonds on which no interest is being paid.

DDD-D All bonds rated DDD, DD and D are in default, with the rating indicating the relative salvage value.

CANADIAN BONDS

Canadian corporate bonds are rated on the same basis as American corporate issues. The ratings measure the intrinsic value of the bonds, but they do not take into account exchange and other uncertainties.

FOREIGN BONDS

Foreign bonds carry the same rating symbols as domestic bonds, but in all cases they are preceded by a ★ to denote a conditional rating. This is applied because the obligor is a foreign body and the bonds are sometimes affected by other than economic factors.

INVESTMENT SECURITIES REGULATION

BY THE COMPTROLLER OF THE CURRENCY EFFECTIVE SEPTEMBER 12, 1963

Part 1, Chapter 1, Title 12 of the Code of Federal Regulations of the United States of America is amended by revising §§ 1.1-1.12 to read as follows:

§1.1 Authority.

This part is issued by the Comptroller of the Currency under the general authority of the national banking laws, 12 U.S.C. 1 et seq and under specific authority contained in paragraph Seventh of 12 U.S.C. 24. The Comptroller of the Currency is charged by the national banking laws with the execution of all laws of the United States relating to the organization, operation, regulation and supervision of national banks and in particular with the execution of 12 U.S.C. 24 which sets forth the corporate powers of national banks. This part interprets and applies paragraph Seventh of 12 U.S.C. 24 to provide for its due execution and for the proper regulation and supervision of the operations of national banks. Paragraph Seventh of 12 U.S.C. 24 also specifically provides for the Comptroller of the Currency to prescribe by regulation (a) limitations and restrictions on the purchase of investment securities by a national bank for its own account and (b) further definition of the term "investment securities."

§1.2 Scope and application.

This part applies to the purchase, sale, dealing in, underwriting, and holding of investment securities by national banks, banks located in the District of Columbia, and by state banks which are members of the Federal Reserve System. It may also apply to a limited extent to others engaged in the banking business. The Comptroller of the Currency is charged by various provisions contained in Chapter 1 of Title 26 of the District of Columbia Code with the supervision of banks located in the District of Columbia. State banks which are members of the Federal Reserve System are, under 12 U.S.C. 335, subject to the same limitations and conditions with respect to the purchasing, selling, underwriting, and holding of investment securities and stock as are applicable in the case of national banks under paragraph Seventh of 12 U.S.C. 24. Dealers in securities are prohibited by 12 U.S.C. 378 from engaging in banking business. Section 378 specifically provides, however, that it does not prohibit national banks or state banks or trust companies (whether or not members of the Federal Reserve System) or other financial institutions or private bankers from dealing in, underwriting, purchasing and selling investment securities to the extent permitted to national banking associations by the provisions of 12 U.S.C. 24.

§1.3 Definitions.

(a) The term "bank" includes national banks, banks located in the District of Columbia, and state banks which are members of the Federal Reserve System.

(b) The term "investment security" means a marketable obligation in the form of a bond, note or debenture which is commonly regarded as an investment security. It does not include investments which are predominantly speculative in nature.

(c) The term "public security" means an obligation described in 12 U.S.C. 24 as not subject to the limitations and restrictions contained therein "as to dealing in, underwriting and purchasing for its own account, investment securities." Public securities include:

(1) Obligations of the United States;

(2) General obligations of any State of the United States or of any political subdivision thereof;

(3) Other obligations listed in paragraph Seventh of 12 U.S.C. 24.

) The term "political subdivision of any State" includes a county, city, or other municipal corporation, a public authority, and generally any cly owned entity which is an instrumentality of the State or of a cipal corporation.

) The phrase "general obligation of any State or of any political sub- on thereof" means an obligation supported by the full faith and credit e obligor. It includes an obligation payable from a special fund when ull faith and credit of a State or any political subdivision thereof is ated for payments into the fund of amounts which will be sufficient rovide for all required payments in connection with the obligation. plies an obligor possessing resources sufficient to justify faith and t.

Limitations and restrictions on purchase and sale of a public security.

bank may deal in, underwrite, purchase and sell for its own account lic security subject only to the exercise of prudent banking judgment. ence will require such determinations as are appropriate for the type ansaction involved. For the purpose of underwriting or investment, nce will also require a consideration of the resources and obligations e obligor and a determination that the obligor possesses resources ent to provide for all required payments in connection with the obli- n.

Limitations and restrictions on purchase of an investment security.

Evidence of obligor's ability to perform. A bank may purchase an nent security for its own account when in its prudent banking ent (which may be based in part upon estimates which it believes eliable), it determines that there is adequate evidence that the obligor will be able to perform all that it undertakes to perform in connection with the security, including all debt service requirements, and that the security may be sold with reasonable promptness at a price which corresponds reasonably to its fair value.

(b) Judgment based predominantly upon reliable estimates. A bank may, subject to limitations set forth in §1.6 (b), purchase an investment security for its own account although its judgment with respect to the obligor's ability to perform is based predominantly upon estimates which it believes to be reliable. Although the appraisal of the prospects of any obligor will usually be based in part upon estimates, it is the purpose of this paragraph to permit a bank to exercise a somewhat broader range of judgment with respect to a more restricted portion of its investment portfolio. It is expected that this authority may be exercised not only in the absence of a record of performance but also when there are prospects for improved performance. It is also expected that an investment security purchased pursuant to this paragraph may by the establishment of a satisfactory financial record become eligible for purchase under paragraph (a) of this section.

(c) Securities ruled eligible by the Comptroller of the Currency. A bank may consider as a factor in reaching its prudent banking judgment with respect to an investment security a ruling published by the Comptroller of the Currency on the eligibility of such security for purchase. Consideration must also be given, however, to the possibility that circumstances on which the ruling was based may have changed since the time of the ruling.

§1.6 Limitations and restrictions on holding investment securities.

(a) Obligations of any one obligor. A bank may not hold at any time investment securities of any one obligor in a total amount in excess of 10 percent of the bank's capital and surplus. For this purpose the amount of an investment security is to be determined on the basis of the par or face value of the security.

(b) Obligations purchased predominantly on the basis of reliable estimates. A bank may not hold at any time investment securities which would not be eligible for purchase pursuant to paragraph (a) of §1.5 in a total amount in excess of 5 percent of the bank's capital and surplus.

(c) Limitations prescribed in eligibility rulings. When a ruling published by the Comptroller of the Currency provides that an investment security is eligible for purchase subject to a specified limitation, a bank may not at any time thereafter purchase such security, if, after such purchase, the bank's holdings of such security would be in excess of the specified limitation.

(d) Public securities. Public securities are not subject to the limitations contained in this section.

§1.7 Limitations and restrictions on purchase, sale and holding of specified obligations.

A bank may deal in and underwrite the obligations of the International Bank for Reconstruction and Development and the Inter-American Development Bank and all bonds, notes and other obligations of the Tennessee Valley Authority, but it may not hold at any one time the obligations of any one of such obligors in a total amount in excess of 10 percent of the bank's capital and surplus.

§1.8 Prudent banking judgment; credit information required.

Every bank shall maintain in its files credit information adequate to demonstrate that it has exercised prudence in making the determinations and carrying out the transactions described in §§1.4 and 1.5.

§1.9 Requests for rulings.

Any bank may request the Comptroller of the Currency to rule on the application of this part, or paragraph Seventh of 12 U.S.C. 24, to any security which it holds, or desires to purchase for its own account as an investment security; or which it holds, or desires to deal in, underwrite, purchase, hold or sell as a public security. Such a request for a rul should be supported by (a) information sufficient to enable the Co troller to make the necessary determination and (b) the bank's appra of the information furnished.

§1.10 Convertible securities.

When a bank purchases an investment security convertible into stoc with stock purchase warrants attached, entries must be made by the b at the time of purchase to write down the cost of such security to amount which represents the investment value of the security consid independently of the conversion feature or attached stock purchase rants. Purchase of securities convertible into stock at the option of issuer is prohibited.

§1.11 Amortization of premiums.

When an investment security is purchased at a price exceeding pa face value, the bank shall:

(a) Charge off the entire premium at the time of purchase; or

(b) Provide for a program to amortize the premium paid or that por of premium remaining after the write-down required by §1.10 so that premium or portion thereof shall be entirely extinguished at or before maturity of the security.

§1.12 Exceptions.

The restrictions and limitations of this part do not apply to secu acquired through foreclosure on collateral, or acquired in good faith way of compromise of a doubtful claim or to avoid a loss in connec with a debt previously contracted.

Dated: September 10, 1963 [SEAL] JAMES J. SAXON
Comptroller of the Curren

All issues subject to all Federal taxes except where noted. Exempt under present laws from State income taxes.

†—After deducting present normal tax of 30% and/or 22% surtax as they apply to the yield shown for each issue. ‡—Approximate—52% tax rate applies to coupon; capital gains rate of 25% to appreciation to par at maturity. ♦—Acceptable at par in payment of Federal estate taxes when actually owned by the decedent at time of his death.

*—Callable on any interest payment date on 4 month's prior notice.

CALLED BONDS SECTION

This section lists alphabetically bonds covered in the Guide which have been called for redemption in whole or in part, indicating the amount called, the call price, date of redemption, and where payment is made. The notice of the call is carried in this section until the redemption date is reached. Numbers of bonds called of partial redemptions may be checked with list on file at our office.

Obviously, it is not practicable to publish within the narrow confines of this publication a comprehensive called bond service, such as is presented in Standard & Poor's "Called Bond Record." Users of the Bond Guide requiring extensive called bond coverage, including a complete record of tenders asked and proposals, information on bonds in default, comprehensive bond interest payments, and redemption data on equities, are referred to that publication.

HOW TO USE STANDARD & POOR'S BOND GUIDE

t is necessary to read carefully the following instructions in order to obtain the correct interpretation of the various abbreviations and data in the Guide.

GENERAL INFORMATION
reat Payments, Bonds Called, Etc.

In this column is given information of a general character which may be necessary to round out the material presented in the other columns. Here will be found such information as latest income bond interest payments, name of the assuming company, if any, guarantors, information on bond committees, status in possible reorganization, etc. Similar additional information occasionally will be presented in other columns when necessary.

Underwriting and MARKET

This column shows, by keys to the Directory of Dealers in the rear of the book, the original underwriter of the issue, shown in italics, and the present interested over-the-counter dealers. Issues traded on national security exchanges are so indicated by abbreviations (Page 7) of those exchanges.

OUTSTANDING
Amt.—Mil-s—Total
This Prior Funded
Issue Liens Debt

This is the amount of the issue outstanding in millions of dollars, as of the balance sheet date shown under Financial Position, unless otherwise noted, except for Railroads which is as of the fiscal year end.

This column shows the amount of obligations which, in the opinion of Standard & Poor's, rank prior to the issue under consideration.

Total funded debt of the company or system, including Purchase Money Obligations, Equipments, Real Estate Mortgages, etc.

FINANCIAL POSITION
—Mil-s— Balance
Cash & Cur. Curr. Sheet
Equiv. Assets Liab.. Date

Cash & Equivalent, Current Assets and Current Liabilities are given in millions of dollars (000,000 omitted), as 17.5—$17,500,000; 1.73—$1,730,000; 0.18—$175,000, etc. All information in this column is brought up to date upon the release of interim statements. The date of the balance sheet from which the information shown was obtained is also given.

Where current balance sheet items are not of analytical significance, special calculations pertinent to the industry in which the company operates are presented, as "Net Asset Value Per $1,000 Bond" for Investment Trusts, etc.

ANNUAL EARNINGS
Times Int. & Misc. Charges Earned
Yrs. End. Historical
Low Low Latest 5 Years

This is the month of the year in which the Company's fiscal year closes.

The number of times that available earnings cover interest and miscellaneous charges, making up what is generally known as "fixed charges," is shown in these columns for the periods of the column heads. In the first two columns, the figures cover the worst year of the period, as a guide to the adequacy of such coverage under the most unfavorable conditions. Coverage figures for years ending March 31 or earlier are shown under the columns of the preceding calendar year.

Earnings available for income bond interest mean net income as reported, but only after deduction of interest on all debt, rentals, and other forms of fixed charges. Preferred dividends are not deducted from these earnings, but are considered separately in the computation of coverages. Earnings shown in the Bond Guide after allowance for income taxes, but before extraordinary charges or credits, unless otherwise noted.

In many instances where important reorganizations have taken place in recent years, the coverage figures are given for previous years on the basis of earnings in those years but on the charges after reorganization. Such cases are correspondingly footnoted.

Interim coverage figures, etc., are shown, when and where available, for the longest accounting interval since the last fiscal year-end.

STANDARD & POOR'S CORPORATION

HOW TO USE STANDARD & POOR'S BOND GUIDE

It is necessary to read carefully the following instructions in order to obtain the correct interpretation of the various abbreviations and data in the Guide.

The index numbers are a visual guide to the columnar data.

INDEX

Exchange

Indicates: ● traded New York Stock Exchange ◗ American Stock Exchange.

BONDS
Name and Description of Issue
Description, Interest Rate, Due and Interest Date

This column gives the name of the issue. In many instances, because of their length, names are abbreviated, as for example, Pr. — Power; Lt. — Light; Ry. — Railway, etc. Also see standard abbreviations used on Page 7. Every effort has been made, within space limitations, to show the exact corperate title of the issuing company.

This column describes the issue, giving the interest rate and due date. Abbreviations are widely used, as for example, Deb—Debenture, Ctfs—Certificates, Ext—External, etc. A complete list of abbreviations used in the Earnings and Ratings Bond Guide will be found on Page 7.

Interest dates are indicated by the first letter of the alternate six months on which coupons are payable. Unless otherwise noted, such interest dates are always the first day of the month. The month of maturity is indicated by a capital letter.

S&P Quality Rating

A complete explanation of Standard & Poor's Bond Quality Ratings is presented on Page 5.

Eligibility

See explanation on Page 4, and Bank Investment Regulations on Page 6.

Tax Status
Legality

Please refer to detailed explanation on Page 4 as to Tax Status.
Please refer to Page 4 for details. Legality features and symbols.

Original Offering Price & Data

This is the price and date at which the issue was originally offered. When necessary, prices are shown to the nearest eighth.

CALL PRICE
For S.F.

This space shows the call price for sinking fund, if any, as well as the regular call price. Unless otherwise indicated, bonds are callable at any time. The symbol † means that the call price shown cannot be used without qualification, in that the price shown will decline within the next twelve months. See also page 4 for other symbols and explanation.

Regular

PRICE RANGE
Historical High Low
Last Year High Low
Current Year High Low

High and Low price ranges are for the calendar years indicated.

Price ranges are not necessarily exclusive for the exchange, if any, on which the bond is currently traded, but are based on the best available data covering the period of the column head, since issuance of the bond.

The price range of "Over-the-Counter" bonds is based on the best available information as to the high and low "Bid" prices during the period. Because of the lack of reliable data, some of these "Over-the-Counter" ranges may be subject to a fair margin of error. Generally, unlisted bond ranges should best be viewed as reasonable approximations.

Last Sale and date
f = flat

Last sale price and date when last sold shown for securities listed on either the New York or American Stock Exchanges. "Flat" means that the bond is traded on a "without accrued interest" basis.

Bid Ask

For listed issues, bid and ask as of date shown over previous column, if no sale occurred that date; for issues traded over-the-counter, latest bid and ask available. Canadian prices shown by ▲.

Yield to Mty.

Yields are computed on the last or on the "Ask" price, except where there is only a "Bid" for the issue. Serial maturities are figured on a current yield basis.

Standard & Poor's Earnings and Ratings

BOND GUIDE

Published DECEMBER • 1963

Standard & Poor's Bond Guide is designed to present in a convenient, compact manner the most pertinent comparative financial and statistical information on a broad list of corporate bonds. Thus, it is an ideal medium for formulating a quick opinion as to the relative investment merits of the numerous bond issues considered, and for following the trend of their market prices and yields. In addition, Standard & Poor's Bond Quality Ratings are presented for most bonds. The issues of the companies are arranged alphabetically, thus providing the utmost ease of reference.

Numerous pages of the Bond Guide are devoted to significant supplementary information, including recent changes in S & P Bond Quality Ratings, changes in Bank Status, long term records of bond yields, graphic yield charts, etc. In addition, a special section in each issue of the Bond Guide is devoted to bonds called for redemption and new bond issues registered with the SEC.

United States Government bonds are presented in still another special section of the book. Federal Land Bank bonds, Federal National Mortgage notes and debentures, Public Authority bonds and New York City and State bonds are covered on yet another page.

Four pages are devoted to a summary of convertible bond provisions, adding to the full coverage given each issue in the main section of the Guide.

Although the Bond Guide is not itself an analytical publication, it represents, nevertheless, the results of intensive and extensive analysis by bond specialists utilizing all our extensive facilities. The Bond Quality Ratings in particular are the end result of wide analytical research and special investigation. The factual data presented have been obtained from official company reports and reports to the SEC.

HOW TO USE THE S & P EARNINGS AND RATINGS BOND GUIDE

The following explanations are in addition to those given in the pilot pages shown on the inside front and inside rear covers.

ELIGIBILITY

Under regulations issued by the Comptroller of the Currency, as shown on Page 4, only certain bond issues are eligible for bank investment. The standing under these regulations of the various bond issues covered by the Bond Guide is indicated under the "Eligibility" column, by the following symbols:

X—This symbol designates bonds rated the equivalent of Standard & Poor's AAA, AA, A or BBB ratings by a majority of the three recognized rating agencies which have assigned ratings to the issue.

X¶—These are "special privilege" bonds. They include "convertible" and "with warrants" issues. In the opinion of Standard & Poor's they may be considered "eligible" provided the speculative value of their "special privilege" is not reflected in their current market price.

Y—These are bonds which do not conform with the above rating classification. It is the S & P opinion that bonds carrying the (Y) symbol are those which may be valued at the average market price for 18 months just preceding examination.

Z—This symbol indicates bonds with a default status.

Q—These are foreign bonds whose bank eligibility is not determined by the ratings of the various agencies.

TAX STATUS

The numerals in this column of the Bond Guide indicate the Federal Income Taxes paid at the source: 1—1% paid by the company, 2—2% paid by the company, O—no tax paid by the company. "R"—indicates tax paid by the holder of the bond (up to 2%) is refunded by the company.

Subscribers requiring comprehensive information on the tax status of bonds are referred to Standard & Poor's "Status of Bonds" and quarterly supplements, which cover the exact tax status under both the Federal and State taxes and serves as a coupon directory.

LEGALITY

Symbols in this column of the Bond Guide indicate representative states in which the various issues covered qualify as legal investments. For all states bonds legal for savings banks also are believed suitable for trust funds. In New Jersey all bonds legal for savings banks are legal for trust funds, but numerous other issues also meet the requirements of the more liberal trust fund law, and are so additionally indicated.

CALL PRICES

As indicated by the column heads, the Earnings and Ratings Bond Guide presents both the regular call price of the bonds covered and the call price for sinking fund, if any.

Unless otherwise indicated, the issues are callable at any time. When a bond is callable only on an interest date, it is so shown by the use of the symbol (*). The symbol (†) means that the call price as given will decline sometime within the next twelve months in accordance with the indenture provisions of the bond. Thus, the call prices so shown must not be used without qualifications. The symbol (‡) means that not only can the bond be called only on an interest date, but also that the call price will decline within the next twelve months.

Non-callable bonds are so indicated by the abbreviation NC. Special abbreviations are also necessary when a bond is not now callable but will be callable at a later date, in which case, for example, the use of 2'66 would mean non-callable now but callable at 102 in 1966. The use, as another exampe of special call features, of ½-3 would indicate the range of call prices on serial maturity bonds, the first figure (100½) being the present call price for the first maturity and the last figure (103) being the call price for the last maturity.

STANDARD & POOR'S BOND RATINGS

In the Standard & Poor's bond quality ratings system, interest-paying bonds are graded into eight classifications ranging from AAA for the highest quality designation through AA, A, BBB, BB, B, CCC to CC for the lowest. Bonds on which no interest is being paid, either because of default or because of "income" characteristics, are given C, DDD, DD and D ratings. United States Government bonds are not rated, but are considered as a yardstick against which to measure all other issues.

BANK QUALITY BONDS

Under present commercial bank regulations bonds rated in the top four categories (AAA, AA, A, BBB or their equivalent) generally are regarded as eligible for bank investment.

AAA Bonds rated AAA are highest grade corporate obligations. They possess the ultimate degree of protection as to principal and interest. Marketwise, they move with interest rates, and hence provide the maximum safety on all counts.

AA Bonds rated AA also qualify as high grade obligations, and in the majority of instances differ from AAA issues only in small degree. Here, too, prices move with the long term money market.

A Bonds rated A are regarded as upper medium grade. They have considerable investment strength but are not entirely free from adverse effects of changes in economic and trade conditions. Interest and principal are regarded as safe. They predominantly reflect money rates in their market behavior, but to some extent, also business conditions.

BBB The BBB, or medium grade category is borderline between definitely sound obligations and those where the speculative element begins to predominate. These bonds have adequate asset coverage and normally are protected by satisfactory earnings. Their susceptibility to changing conditions, particularly to depressions, necessitates constant watching. Marketwise, the bonds are more responsive to business and trade conditions than to interest rates. This group is the lowest which qualifies for commercial bank investment.

SUB-STANDARD BONDS

As we move down the rating scale, beginning with BB, investment characteristics weaken and the speculative elements become progressively stronger. The fortunes of the obligors change rapidly with economic and trade conditions and in adverse periods interest requirements may not be earned. Investment in bonds in this group must be under constant surveillance. Prices fluctuate widely with changing business conditions and with little regard for the money market.

BB Bonds given a BB rating are regarded as lower medium grade. They have only minor investment characteristics. In the case of utilities, interest is earned consistently but by narrow margins. In the case of other types of obligors, charges are earned on average by a fair margin, but in poor periods deficit operations are possible.

B Bonds rated as low as B are speculative. Payment of interest cannot be assured under difficult economic conditions.

CCC-CC Bonds rated CCC and CC are outright speculations, with the lower rating denoting the more speculative. Interest is paid, but continuation is questionable in periods of poor trade conditions. In the case of CC ratings the bonds may be on an income basis and the payment may be small.

C The rating of C is reserved for income bonds on which no interest is being paid.

DDD-D All bonds rated DDD, DD and D are in default, with the rating indicating the relative salvage value.

CANADIAN BONDS

Canadian corporate bonds are rated on the same basis as American corporate issues. The ratings measure the intrinsic value of the bonds, but they do not take into account exchange and other uncertainties.

FOREIGN BONDS

Foreign bonds carry the same rating symbols as domestic bonds, but in all cases they are preceded by a ★ to denote a conditional rating. This is applied because the obligor is a foreign body and the bonds are sometimes affected by other than economic factors.

INVESTMENT SECURITIES REGULATION

BY THE COMPTROLLER OF THE CURRENCY EFFECTIVE SEPTEMBER 12, 1963

Part 1, Chapter 1, Title 12 of the Code of Federal Regulations of the United States of America is amended by revising §§ 1.1-1.12 to read as follows:

§1.1 Authority.

This part is issued by the Comptroller of the Currency under the general authority of the national banking laws, 12 U.S.C. 1 et seq and under specific authority contained in paragraph Seventh of 12 U.S.C. 24. The Comptroller of the Currency is charged by the national banking laws with the execution of all laws of the United States relating to the organization, operation, regulation and supervision of national banks and in particular with the execution of 12 U.S.C. 24 which sets forth the corporate powers of national banks. This part interprets and applies paragraph Seventh of 12 U.S.C. 24 to provide for its due execution and for the proper regulation and supervision of the operations of national banks. Paragraph Seventh of 12 U.S.C. 24 also specifically provides for the Comptroller of the Currency to prescribe by regulation (a) limitations and restrictions on the purchase of investment securities by a national bank for its own account and (b) further definition of the term "investment securities."

§1.2 Scope and application.

This part applies to the purchase, sale, dealing in, underwriting, and holding of investment securities by national banks, banks located in the District of Columbia, and by state banks which are members of the Federal Reserve System. It may also apply to a limited extent to others engaged in the banking business. The Comptroller of the Currency is charged by various provisions contained in Chapter 1 of Title 26 of the District of Columbia Code with the supervision of banks located in the District of Columbia. State banks which are members of the Federal Reserve System are, under 12 U.S.C. 335, subject to the same limitations and conditions with respect to the purchasing, selling, underwriting, and holding of investment securities and stock as are applicable in the case of national banks under paragraph Seventh of 12 U.S.C. 24. Dealers in securities are prohibited by 12 U.S.C. 378 from engaging in banking business. Section 378 specifically provides, however, that it does not prohibit national banks or state banks or trust companies (whether or not members of the Federal Reserve System) or other financial institutions or private bankers from dealing in, underwriting, purchasing and selling investment securities to the extent permitted to national banking associations by the provisions of 12 U.S.C. 24.

§1.3 Definitions.

(a) The term "bank" includes national banks, banks located in the District of Columbia, and state banks which are members of the Federal Reserve System.

(b) The term "investment security" means a marketable obligation in the form of a bond, note or debenture which is commonly regarded as an investment security. It does not include investments which are predominantly speculative in nature.

(c) The term "public security" means an obligation described in 12 U.S.C. 24 as not subject to the limitations and restrictions contained therein "as to dealing in, underwriting and purchasing for its own account, investment securities." Public securities include:

(1) Obligations of the United States;

(2) General obligations of any State of the United States or of any political subdivision thereof;

(3) Other obligations listed in paragraph Seventh of 12 U.S.C. 24.

(d) The term "political subdivision of any State" includes a county, city, own or other municipal corporation, a public authority, and generally any ublicly owned entity which is an instrumentality of the State or of a unicipal corporation.

(e) The phrase "general obligation of any State or of any political subivision thereof" means an obligation supported by the full faith and credit f the obligor. It includes an obligation payable from a special fund when ne full faith and credit of a State or any political subdivision thereof is bligated for payments into the fund of amounts which will be sufficient o provide for all required payments in connection with the obligation. implies an obligor possessing resources sufficient to justify faith and redit.

1.4 Limitations and restrictions on purchase and sale of a public security.

A bank may deal in, underwrite, purchase and sell for its own account public security subject only to the exercise of prudent banking judgment. rudence will require such determinations as are appropriate for the type f transaction involved. For the purpose of underwriting or investment, rudence will also require a consideration of the resources and obligations f the obligor and a determination that the obligor possesses resources fficient to provide for all required payments in connection with the obliation.

1.5 Limitations and restrictions on purchase of an investment security.

(a) Evidence of obligor's ability to perform. A bank may purchase an vestment security for its own account when in its prudent banking dgment (which may be based in part upon estimates which it believes be reliable), it determines that there is adequate evidence that the obligor will be able to perform all that it undertakes to perform in connection with the security, including all debt service requirements, and that the security may be sold with reasonable promptness at a price which corresponds reasonably to its fair value.

(b) Judgment based predominantly upon reliable estimates. A bank may, subject to limitations set forth in §1.6 (b), purchase an investment security for its own account although its judgment with respect to the obligor's ability to perform is based predominantly upon estimates which it believes to be reliable. Although the appraisal of the prospects of any obligor will usually be based in part upon estimates, it is the purpose of this paragraph to permit a bank to exercise a somewhat broader range of judgment with respect to a more restricted portion of its investment portfolio. It is expected that this authority may be exercised not only in the absence of a record of performance but also when there are prospects for improved performance. It is also expected that an investment security purchased pursuant to this paragraph may by the establishment of a satisfactory financial record become eligible for purchase under paragraph (a) of this section.

(c) Securities ruled eligible by the Comptroller of the Currency. A bank may consider as a factor in reaching its prudent banking judgment with respect to an investment security a ruling published by the Comptroller of the Currency on the eligibility of such security for purchase. Consideration must also be given, however, to the possibility that circumstances on which the ruling was based may have changed since the time of the ruling.

§1.6 Limitations and restrictions on holding investment securities.

(a) Obligations of any one obligor. A bank may not hold at any time investment securities of any one obligor in a total amount in excess of 10 percent of the bank's capital and surplus. For this purpose the amount of an investment security is to be determined on the basis of the par or face value of the security.

(b) Obligations purchased predominantly on the basis of reliable estimates. A bank may not hold at any time investment securities which would not be eligible for purchase pursuant to paragraph (a) of §1.5 in a total amount in excess of 5 percent of the bank's capital and surplus.

(c) Limitations prescribed in eligibility rulings. When a ruling published by the Comptroller of the Currency provides that an investment security is eligible for purchase subject to a specified limitation, a bank may not at any time thereafter purchase such security, if, after such purchase, the bank's holdings of such security would be in excess of the specified limitation.

(d) Public securities. Public securities are not subject to the limitations contained in this section.

§1.7 Limitations and restrictions on purchase, sale and holding of specified obligations.

A bank may deal in and underwrite the obligations of the International Bank for Reconstruction and Development and the Inter-American Development Bank and all bonds, notes and other obligations of the Tennessee Valley Authority, but it may not hold at any one time the obligations of any one of such obligors in a total amount in excess of 10 percent of the bank's capital and surplus.

§1.8 Prudent banking judgment; credit information required.

Every bank shall maintain in its files credit information adequate to demonstrate that it has exercised prudence in making the determinations and carrying out the transactions described in §§1.4 and 1.5.

§1.9 Requests for rulings.

Any bank may request the Comptroller of the Currency to rule on the application of this part, or paragraph Seventh of 12 U.S.C. 24, to any security which it holds, or desires to purchase for its own account as an investment security; or which it holds, or desires to deal in, underwrite, purchase, hold or sell as a public security. Such a request for a ruli should be supported by (a) information sufficient to enable the Com troller to make the necessary determination and (b) the bank's apprai of the information furnished.

§1.10 Convertible securities.

When a bank purchases an investment security convertible into stock with stock purchase warrants attached, entries must be made by the ba at the time of purchase to write down the cost of such security to amount which represents the investment value of the security consider independently of the conversion feature or attached stock purchase wa rants. Purchase of securities convertible into stock at the option of t issuer is prohibited.

§1.11 Amortization of premiums.

When an investment security is purchased at a price exceeding par face value, the bank shall:

(a) Charge off the entire premium at the time of purchase; or

(b) Provide for a program to amortize the premium paid or that porti of premium remaining after the write-down required by §1.10 so that su premium or portion thereof shall be entirely extinguished at or before t maturity of the security.

§1.12 Exceptions.

The restrictions and limitations of this part do not apply to securit acquired through foreclosure on collateral, or acquired in good faith way of compromise of a doubtful claim or to avoid a loss in connecti with a debt previously contracted.

Dated: September 10, 1963 [SEAL] JAMES J. SAXON
Comptroller of the Currency

All issues subject to all Federal taxes except where noted. Exempt under present laws from State income taxes.

†—After deducting present normal tax of 30% and/or 22% surtax as they apply to the yield shown for each issue. ‡—Approximate—52% tax rate applies to coupon; capital gains rate of 25% to appreciation to par at maturity. ♦—Acceptable at par in payment of Federal estate taxes when actually owned by the decedent at time of his death.

*—Callable on any interest payment date on 4 month's prior notice.

CALLED BONDS SECTION

This section lists alphabetically bonds covered in the Guide which have been called for redemption in whole or in part, indicating the amount called, the call price, date of redemption, and where payment is made. The notice of the call is carried in this section until the redemption date is reached. Numbers of bonds called of partial redemptions may be checked with list on file at our office.

Obviously, it is not practicable to publish within the narrow confines of this publication a comprehensive called bond service, such as is presented in Standard & Poor's "Called Bond Record." Users of the Bond Guide requiring extensive called bond coverage, including a complete record of tenders asked and proposals, information on bonds in default, comprehensive bond interest payments, and redemption data on equities, are referred to that publication.

Issue December, 1963	Amount Called	Date Called	Call Price	Paying Agent

HOW TO USE STANDARD & POOR'S BOND GUIDE

It is necessary to read carefully the following instructions in order to obtain the correct interpretation of the various abbreviations and data in the Guide.

GENERAL INFORMATION
Interest Payments, Bonds Called, Etc.

In this column is given information of a general character which may be necessary to round out the material presented in the other columns. Here will be found such information as latest income bond interest payments, name of the assuming company, if any; guarantors, information on bond committees, status in possible reorganization, etc. Similar additional information occasionally will be presented in other columns when necessary.

Underwriting and MARKET

This column shows, by keys to the Directory of Dealers in the rear of the book, the original underwriter of the issue, shown in italics, and the present interested over-the-counter dealers. Issues traded on national security exchanges are so indicated by abbreviations (Page 7) of those exchanges.

OUTSTANDING
Amt. —Mil-$— Total
This Issue | Prior Liens | Fund Debt

This is the amount of the issue outstanding in millions of dollars, as of the balance sheet date shown under Financial Position, unless otherwise noted, except for Railroads which is as of the fiscal year end.

This column shows the amount of obligations which, in the opinion of Standard & Poor's, rank prior to the issue under consideration.

Total funded debt of the company or system, including Purchase Money Obligations, Equipments, Real Estate Mortgages, etc.

FINANCIAL POSITION
—Mil-$— | Balance
Cash & Equiv. | Curr. Assets | Curr. Liabs. | Sheet Date

Cash & Equivalent, Current Assets and Current Liabilities are given in millions of dollars (000,000 omitted), as 17.5—$17,500,000; 1.75—$1,750,000; 0.18—$175,000, etc. All information in this column is brought up to date upon the release of interim statements. The date of the balance sheet from which the information shown was obtained is also given.

Where current balance sheet items are not of analytical significance, special calculations pertinent to the industry in which the company operates are presented, as "Net Asset Value Per $1,000 Bond" for Investment Trusts, etc.

Yrs. End.

This is the month of the year in which the Company's fiscal year closes.

ANNUAL EARNINGS
Times Int. & Misc. Charges Earned
Historical
Low | Low | Latest 3 Years

The number of times that available earnings cover interest and miscellaneous charges, making up what is generally known as "fixed charges," is shown in these columns for the periods of the column heads. In the first two columns only the figure representing the worst year of the period is given, as a guide to the adequacy of such coverage under adverse cyclical conditions. Coverage figures for fiscal years ending March 31 or earlier are shown under the columns of the preceding calendar year.

Earnings available for income bond interest payments are shown as a percent of par value of the issue outstanding. Fixed charges include not only interest on funded debt, but also interest on bank loans and other forms of floating debt, amortization charges, discounts on securities sold, and any other similar charges. Earnings available for fixed charges are calculated by Standard & Poor's and shown in the Bond Guide after allowance for income taxes, but before extraordinary charges or appropriations to special reserves.

In many instances where important reorganizations have taken place in recent years, the coverage figures are given for previous years on the basis of earnings in those years for the charges after reorganization. Such cases are correspondingly footnoted.

Interim coverage figures, etc., are shown, when and where available, for the longest accounting interval since the last fiscal year-end.
